

General Feature

- Easy to use, no training required. Just throw/roll the ball into the fire.
- Light weight. Only 1.3 kilograms.
- Activates automatically when in contact with fire.
- Emits a sound which also acts as a fire alarm, upon activation.
- Easy to install.
- Safe for the environment.
- Extinguishing Agent.
- Type: Dry chemical powder.
- Contents: Mono Ammonium Phosphate.

Caution

- Make sure the arrow always points upwards when in mounted position.
- For class B fires, avoid manual application, refer to automatic application only.
- Do not use ball as a toy.
- Keep out of children's reach.
- In case of powder spillage due to leakage or cracks, sweep clean area and flush with water.

Instructions for Use

Automatic Application

- Mount ball within 30 centimeters over any potential hazard.
- Activates automatically when in contact with fire.
- Best mounted in high risk areas. For example, areas above electrical circuit breakers, overloaded electrical outlets or any potential hazard place.

Manual Application

- When fire erupts, take the nearest available Fire Extinguishing Ball and throw/roll it into the fire from a distance of at least 2 meters and move away from fire.
- Activation occurs within 3 to 10 seconds, dispersing a chemical powder to extinguishing the fire quickly.
- Throw/roll in additional Fire Extinguishing Ball if required.

Storage condition:

Keep dry and away from direct sunlight.

Technical information

A Ordinary flammable materials.

B Flammable and combustible liquid.

C Gas.

E Electrical Appliances -5000 V

Fire Extinguishing Ball can be placed on a shelf top, tabletop, along the hallway or any visible area of easy access. Fire Extinguishing Ball is best mounted in high risk areas such as kitchens, electrical circuit breakers overloaded electrical outlets, or near fireplaces.
